

IN THE ABSTRACT

The Abstract as amended below shows added text with underlining and deleted text with ~~strikethrough~~.

Please **CANCEL** the previous Abstract.

A **NEW** Abstract according to the below amendments is submitted on a separate sheet attached to this Amendment (37 CFR 1.72).

AI --A telephone set and an information terminal are connected by a packet switched network. The information terminal has a control target list in which a predetermined telephone set information is stored, and a ~~first control means~~terminal controller. The ~~first control means~~terminal controller generates, based on an instruction from ~~the~~a user ~~(#201)~~, a control command ~~wherein~~in which an instruction related to ~~voice~~multimedia phone communication is recorded, and sends that command to the predetermined telephone set ~~(#202)~~. The predetermined telephone set has a terminal list ~~wherein is stored a predetermined~~storing information about the information terminal, and a ~~second control means~~telephone controller. The ~~second control means~~generates (#204, 205)telephone controller generates, based on ~~a~~the control command received from the ~~predetermined~~ information terminal ~~(#203)~~, a call control command for performing ~~voice~~multimedia phone communication with another telephone set on the packet switched network, and sends that command to the other telephone set ~~(#206)~~.--
